As can be observed from the tariff that Delhi Jal Board emphasizes on the conservation of water and tariff is designed on the principle- 'Use More Pay More'. Hence, consumers are advised to conserve water by:-

1. Plugging all leakages in pipes, joints, taps, overhead tanks etc.
2. To use kitchen waste water for gardening purposes.
3. To wash vehicle etc. by bucket instead of pipe.
4. Install valve before meter and close it when water is not use.
5. Consumers should use MDPE pipes for underground position for carrying portable water.

Tariff consists of following components:

1. Water-to be measured on volumetric charges of water consumed as reported in meter.
2. Sewerage maintenance charge- @60% of water volumetric consumption charges.
3. Service Charges-Levied on the basis of slab wise consumption.
4. Meter rent in case meter has been provided by DJB.

How to Calculate Bill- Divide the total units consumed by number of days for which bill has been issued and multiply by 30 to give per month average water consumption. Water consumption charge (multiplying monthly charge by the actual period of reading) will be calculated as per tariff for the respective category as mentioned above. Sewerage maintenance charge will be 60% of water consumption charges. Add service charges as per respective category and Consumption slab. It will give you the bill amount
